

PRÄAMBEL

§ 3

In the dual bachelor's degree programme Logistics Management, each semester comprises a theoretical period at the university and a practical period at the company. The theoretical period at the university comprises lecture weeks, special weeks and exam weeks. Special weeks include event which, due to their special organisational requirements, do not fit into the structure of the regular lecture weeks.

The study programme breaks down into three parts:

In the first academic year, students are taught the basic terms as well as professional and methodological fundamentals of business administration. In addition, the first basics in logistics are taught.

In the second academic year, students expand the basic professional and methodological knowledge acquired, particularly in terms of functions and structures related to logistics.

In the third academic year students take their minor and study the elective module. The student should write their bachelor's thesis in the third academic year.

The professional part of the dual course is carried out at the company on the basis of a sample training plan, which is part of the agreement between HSBA and the participating company. By teaching special technical knowledge in the respective business area in addition to general basic competencies, the company has the chance to have its size, industry and process taken into consideration. During the professional period, the companies support the course content on the basis of the module descriptions.

HSBA ensures that the professional part of the dual course is carried out in accordance to the skills and qualification objectives defined in the module descriptions. To this end, HSBA lecturers support the students during their practical periods, and project work or practical reports focus on the professional part of the course.

§ 5
STUDIEN- UND PRÜFUNGSPLAN /
COURSE AND EXAM SCHEDULE

§ 6
ÜBERGANGSREGELUNG /
TRANSITIONAL PROVISIONS

These regulations shall apply for the first time to students enrolled in the specified degree programme on 01.10.2022. Future changes will also apply to students enrolled after this date, provided that the changes only have an advantageous effect on them. Should this not be the case, HSBA will ensure this through appropriate measures.

§ 7
INKRAFTTRETEN /
ENTRY INTO FORCE

These course-specific provisions enter into force on the day after approval by the Behörde für Wissenschaft und Forschung der Freien und Hansestadt Hamburg (Hamburg authorities for science and research).
